Introduction

This user guide is your manual to lead you through every aspect of prescribing and dispensing on the National Veterinary Prescription System (NVPS).

As every species has unique prescription requirement elements, there are user guides which cover all aspects of prescribing and dispensing. Also, there are differing aspects and requirements for Veterinary Medicinal Product (VMP) and Medicated Feed (MF) prescriptions. Please ensure you are viewing the correct guide for your needs.

This is the user guide for dispensing VMP. This user guide will show you how to complete each screen by describing and indicating how to fill in the required fields.

Any queries please contact NVPS@agriculture.gov.ie

Screen 1 - Search for prescription

Enter the line-item or Prescription Id into the search bar. You can search your practice prescriptions or just the prescriptions you have created.

The screenshot shows the NVPS (National Veterinary Prescription System) interface. The header is dark green with the NVPS logo and text. A sidebar on the left contains 'Prescription search' and 'Log out'. The main area shows the user is logged in as 'TEST COMPANY MULRY PRODUCTS LTD' and includes a warning about recording VMP or Medicated Feed. The 'Prescription search' section contains instructions, a search bar with the text '001SLDA3S85G0QQA', a search icon, and a 'Clear search' link. Two blue callout boxes are present: 'Step 1' points to the search bar, and 'Step 2' points to the search icon.

Step 1 - You can search by Line-item or Prescription ID.

Step 2- Click on the search icon.

Screen 2 - Prescription confirmation

Confirm prescription

Prescription details

Prescription ID 001s lda3 s85g 0qoa
