Screen 5 - Prescription Completed	8

Screen 1 - Prescription Search

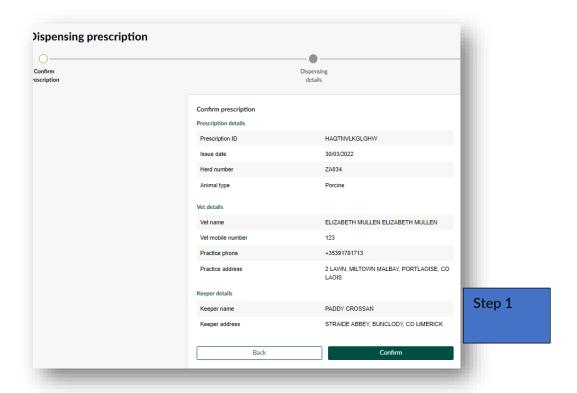

Step 1 - Enter the prescription or line-item ID supplied by your customer.

All prescription and line-item ids will be 16 characters.

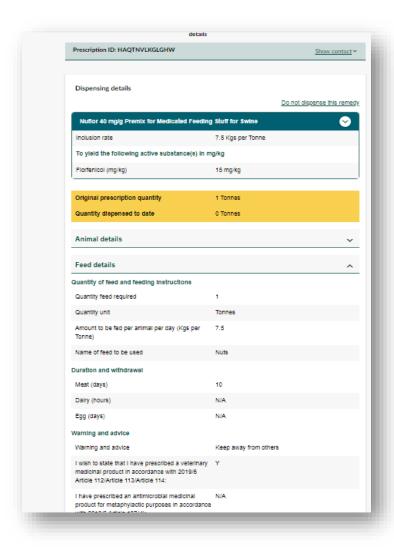

Screen 2 - Prescription Confirmation

Step 1 – Confirm the customer is the person named on the prescription. If you are satisfied this is the correct prescription, click confirm.

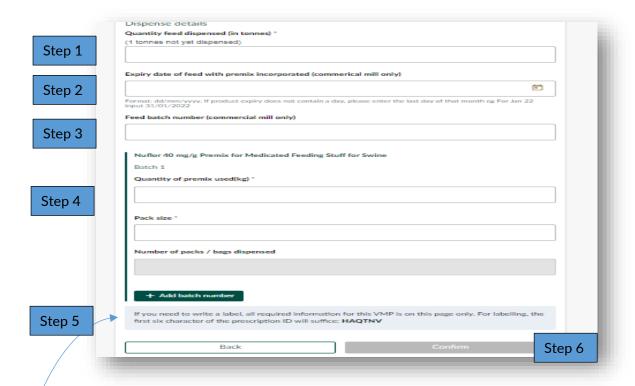

Screen 3 - Prescription Details

Step 1 - You are then given the full details for dispensing.

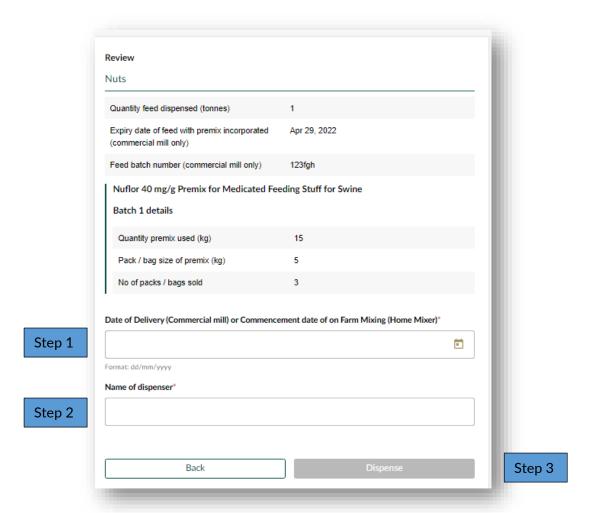

Screen 3 - Prescription Fulfillments

- Step 1 The expiry date of the finished feed must adhere to the SPC guidelines for the premix that has been incorporated.
- Step 2 The batch number to be entered is the batch number of the finished feed with the premix incorporated this is the batch number that is assigned by the mill.
- Step 3 The finished feed only has the option for one batch number to be entered; In practice it was pointed out that there may be more than one batch. We can work around this by using the current field and using the word 'and' or '/' to define different batches
- Step 4 Currently there is no need to add additional batch numbers for premix the batch number of the premix is not being recorded The quantity of premix can be fully entered in the field for batch 1.
- Step 5 If you wish to include a prescription reference on the feed label the reference is provided on this page.
- Step 6 Click confirm once all details are entered correctly.

Screen 4 - Prescription Review

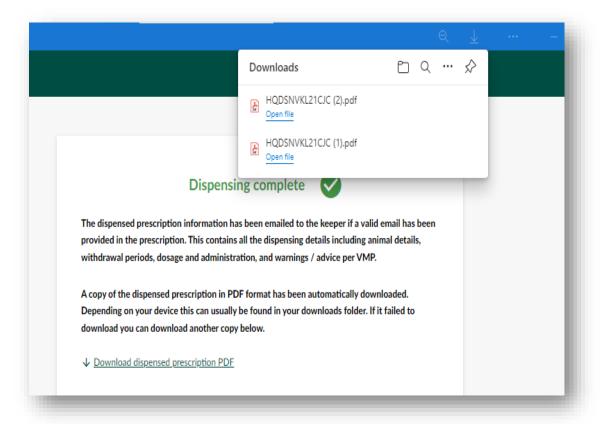

Step 1 - Once you have reviewed the details, enter the date it will be delivered to the farm / keeper.

Step 2 - Enter the name of the person dispensing – this should be the same name as the person who has logged in and completed the prescription.

Step 3 - Click Dispense

Screen 5 - Prescription Completed

- The system will automatically download the dispensing information in PDF. You should retain this for your records or change the name to suit your own recording process.
- You may also wish to send a copy of this to the keeper for their own records. You
 are also able to print a copy to send with the delivery dockets
